OBJECTIVES

To secure a challenging role in Cybersecurity, leveraging my skills in VAPT, SOC operations, and Cloud security. I aim to use my experience in CTF challenge development and automation to drive company growth while proactively learning and adapting to new security technologies.

WORK EXPERIENCE

Cyber Security Intern - Cypherdote - JULY 2025

- Performed functionality testing on security products, identified and reported bugs to improve product.
- Created user-friendly documentation and reusable email templates, ensuring consistency in knowledge sharing and client communication

PROJECTS

ForensiX — Automated Stego Challenge Generator - Nov 2025

- Built an automated tool to generate steganography-based CTF challenges with encoded messages inside images.
- **Technology Used** : Python, Flask, ExifTool, Binwalk, ZSteg

Sentinel-AI — Secure Proxy for Cloud AI - Feb 2026

- Developed a secure proxy using FastAPI to intercept and protect sensitive data sent to third-party AI services.
- Implemented automated PII detection and masking using Presidio to prevent data leaks and ensure secure AI interactions.
- **Technology Used**: Python, FastAPI, Microsoft Presidio, REST APIs, PII Masking

EDUCATION

B.E CSE(Cyber Security)

2023-2027

PSNA College of Engineering and Technology
CGPA - 8.5

12th Grade

2021-2022

SET Vidhyadevi Matric Hr Sec School
Percentage - 87.33%

ADDITIONAL INFORMATION

- **Programming Language** : Java, Python
- **Tools** : Nmap, Burp Suite, Wireshark, Metasploit, Nessus (Basics), Splunk (Basic)
- **Fundamental Concepts** : Networking, OWASP Top 10, Linux
- **Certifications** : CEH(EC-Council) , Cloud Security(Palo Alto) , Java(NPTEL) , Cybersecurity Essentials(CISCO) , Linux Fundamentals(TCM Security)
- **Awards/Activities**: Secured 1st position in national level CTF at Sri Eshwar College & Secured Top 10 at many National & International level CTF
- **Achievements** : Conducted 2 days Bootcamp and national-level CTF at PSNACET
